PROFESSIONAL SUMMARY

Full Stack Developer skilled in Node.js, Express.js, React.js, and MySQL, with hands-on experience building REST APIs, JWT authentication systems, and backend-focused web applications using clean MVC architecture.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Database: MySQL, MongoDB (Mongoose)

Core Concepts: MVC Architecture, Middleware, Async/Await, API Validation

Tools: Git, GitHub, Postman, VS Code, NPM

Platforms: Vercel, Netlify, Render

EXPERIENCE

Full Stack Developer Intern (Remote)

Avyukt Core Technologies | Apr 2025 – Jun 2025

- Worked on full-stack web applications using React.js, Node.js, Express.js, and MongoDB
- Developed REST APIs and integrated frontend with backend services
- Implemented authentication, CRUD operations, and responsive UI components
- Participated in debugging, testing, and feature enhancement workflows

Design & Production Coordinator – INNBOX MODULAR PREFAB

Mar 2024 – Sep 2024

- Assisted in modular prefab design coordination and fabrication workflow management
- Worked with AutoCAD drawings for fabrication planning and structural layouts
- Coordinated with production and site teams to support manufacturing operations
- Assisted in material planning, documentation, and workflow tracking
- Supported quality and fabrication processes for modular construction projects

PROJECTS

Smart Job Tracker Platform

Tech Stack: React.js, Node.js, Express.js, MySQL, Tailwind CSS

- Developed a full-stack job tracking platform with recruiter and candidate modules
- Built secure JWT authentication and role-based access control
- Designed REST APIs for job posting, job applications, interview tracking, and resume management
- Created recruiter dashboard to manage applicants and hiring workflows
- Implemented pagination, filtering, middleware validation, and centralized error handling
- Structured backend using MVC architecture for scalability and maintainability

GitHub: <https://github.com/tejapolnati/job-tracker-backend>

Inventory & Sales Management System

Tech Stack: React.js, Node.js, Express.js, MySQL

- Built full-stack inventory and sales management application for product and order tracking
- Developed REST APIs for inventory management, order processing, and sales reporting
- Implemented analytics dashboard for stock monitoring and revenue insights
- Added product search, filtering, sorting, and pagination features
- Integrated form validation, protected routes, and secure API communication

EDUCATION

B.Tech – Mechanical Engineering KL University, Guntur | 2023

CERTIFICATION

NextWave CCPB – Full Stack (MERN) Development
